Professional Summary

Generative AI creative professional with experience across AI image/video production, cinematic visual development, synthetic media, film/VFX workflows, creative strategy, and AI pipeline design. Contributed to AI production and R&D for Ramayana at DNEG, including 50+ shots across face-swap and lip-sync workflows. Delivered high-volume creative productio across 140+ clients and 50+ projects, while building and adapting AI workflows for faster concept development, asset generation, and production delivery.

SELECTED IMPACT

- **140+** Clients
- **50+** Projects
- **9K+** AI Images
- **150+** AI Videos
- **15+** AI Workflows
- **10K+** Design Assets
- **50+** Film Shots
- **62.5%** Faster Concept Generation

Experience

DNEG - [Double Negative]

Generative Ai Artist

Remote
Jan 2026 –April 2026

- Developed production-ready generative workflows for cinematic digital humans and asset generation within VFX pipelines.
- Supported high-fidelity identity and performance transfer workflows using **Metaphysic technologies** within the **Brahma ecosystem.**
- Built scalable ComfyUI-based systems for image and video synthesis, accelerating R&D iteration cycles by **30%.**
- Contributed to **face ingest**, **face swap**, **lip sync**, and **identity-preserving** workflows for realistic digital performances.
- Utilized **MetaFace systems** and **DGX infrastructure** for facial reconstruction, model inference, and scalable generation.
- Integrated generated outputs into post-production pipelines using Nuke for compositing and shot validation.
- Supported generative workflows in **Ramayana**, **DUNE 3**, **The Oddesey** enabling production-ready cinematic integration.

IMPROMP2LABS

Co- Founder / Gen AI Creative Director

Hyderabad, India - Hybrid
Nov 2025 - Present

- Directed cinematic short-form campaigns and synthetic media productions for global brand content for campaigns involving **NFL**, **Porsche**, **Jumanji**, and **INDmoney**.
- Built end-to-end GenAI pipelines for rapid image and video production, reducing content iteration time by **40%**.
- Combined creative direction with prompt architecture to maintain cinematic consistency across AI-generated campaigns.
- Developed scalable synthetic media workflows that improved creative delivery speed and visual consistency by **35%.**

CYBEREDGE

AI Design Engineer

Hyderabad, India - Hybrid
Nov 2024 – Nov 2025

- Built AI-powered creative pipelines, improving campaign engagement by **53%** and reducing production time by **35%**.
- Developed prompt-driven automation systems that improved creative consistency and reduced revision cycles by **40%**.

PREMA SAI DESIGNERS

Prompt Engineer / Senior Creative Designer

Hyderabad, India - Onsite
Aug 2018 – Oct 2024

- Introduced AI-assisted creative workflows, reducing production turnaround by **25%** across campaign asset generation.
- Built scalable Canva + AI pipelines and brand systems, increasing client digital reach by **35%.**

Education

- **Bachelor of Engineering (CSE/IT)** — Vignan's Institute of Technology & Science — 2021 – 2024
- **Diploma in Mechanical Engineering** — Anurag College of Engineering — 2015 – 2018
